SKILLS

Javascript, HTML, CSS, React, Node, Postgres, GIT, PWA, Wordpress

PERSONAL PROJECTS

Helping Hands | Helping Hands

Built with React, Node, Auth0 and PostgreSQL

Helping hands is a Hub of compiled services for the homeless and needy in the Dallas area.

- Shows map and searchable table of services, hours, location and phone number
- Displays searchable table of places to donate towards volunteer at.
- Login page using Auth0 enabling the user to add and update their services to the public table.

Snap Collector | snapcollector.com

Built with React, Redux, Node, Auth0 and Postgres.

A group built Progressive Web App to manage and share interactive trading card collections.

- Used openCV to track key points on images, allowing detection of duplicates within collections
- Implemented Cypress for integration testing
- Integrated Auth0 to allow for a trusted, secure login experience
